

The Life Cycle of a Frog

Describe each stage of a frog life cycle.

Use the PowerPoint and the Internet to write about the development of a frog. Include lots of detail and pictures where you can!

Information	Picture
<p>Stage 1 An adult frog lays eggs</p>	 A microscopic view of a cluster of frog eggs, showing their white, oval shape and dark spots.
<p>Stage 2 The eggs hatch and a tadpole comes out</p>	 A photograph of a dark-colored tadpole with a long tail, swimming in shallow, yellowish water.
<p>Stage 3 The tadpole evolves into a froglet</p>	 A photograph of a small, brown froglet sitting on a light-colored, textured rock.
<p>Stage 4 The froglet evolves into an adult frog and then it repeats and repeats</p>	 A photograph of an adult brown frog with dark spots, sitting on a white background.

The Life Cycle of a Frog
